Announcement

THIS is our fifth year in the seed business, and every year from the beginning has shown a good increase over the preceeding year. Our customers have stood by us from the beginning and many new ones are added each year. It has been our aim and policy to handle the highest grade of seeds we could procure and to secure all new varieties of farm seeds possessing real merit, acclimate them and introduce them to our trade. By keeping in touch with developments in agricultural and horticultural lines we have been able to offer to the farmers of this section many new and valuable varieties of seeds. That we have been successful in our efforts is apparent by the continued growth of our business. We want to assure our friends and customers that we shall continue to keep our goods up to a standard that will merit their patronage in the future as in the past.

Our Goods and Prices

IT has always been our aim to offer nothing but the best in seeds and to keep our prices as reasonable as possible consistent with high quality. There may be some houses that offer seeds at lower prices, but we maintain that there are none offering our quality for less money than ours cost you. If you will show us your samples and prices from other houses and let us show you our goods we can convince you.

All prices on grass and field seeds subject to market fluctuations.

Our Guarantee

WE give you the same guarantee as to variety, description and productiveness as any other reliable seed house in this country. All seed houses use practically the same form of guarantee. We use all possible care in the selection and care of our stock to keep it pure and reliable, but assume no responsibility for the crop. We can and will give tests from reliable sources on all of our farm seeds, which is all any reliable seed house can do.

TWIN FALLS, IDAHO

PRICE LIST

Oats

Regenerated Swedish Select.

(Idaho Grown Acclimated.)

Regenerated Swedish Select oats originated with the Garton Seed Co., of England. It is an improved Swedish Select, or what is known as the "Best American Oat." Our stock was secured last season through one of the best Agricultural Colleges in America. It is pure and of fancy quality, all just alike. Our tests show 48 lbs. per bushel.

are very similar. We consider it next to the Regenerated in quality. We have had this strain for the past three years, and it has proven one of the heaviest yielders in this section. Our stock is fine, weight 48 lbs. per bushel, and we are offering it at a price that should appeal to any one whether sowing a large or small acreage. If you want a good variety you should be interested in this.

Price, 100 lbs., \$2.00; in lots of 1,000 lbs. or more, \$1.50 per hundred.

Swedish Select Oats

Regenerated Swedish Select is a heavy yielding variety of white oats, medium in height, with a good stiff straw and very plump short berry, almost as heavy as wheat. It is an early oat, maturing as soon as any heavy yielding variety. If you want to get a start in some fancy pure oats, order some of our Regenerated Swedish.

Price per 100 lbs., \$2.50.

SWEDISH SELECT.

The Swedish Select oat is the parent of the Regenerated Swedish described above, and its characteristics

Barley

Wisconsin Pedigree Oderbrucker.

(Idaho Grown Acclimated.)

For four years in succession this variety has taken World's prize as the best malting variety. It was developed by the Wisconsin Agricultural College, where Prof. A. R. Moore spent many years of painstaking work on its development. It is claimed to be the heaviest yielder of all barleys, and for malting qualities is unequaled. The heads are extremel long and well filled, six rowed, and the berries very plump and even in size. Our stock was

secured a year ago from the most reliable source, and at great expense to us. It is pure and of the finest possible quality. Tests 55 lbs. per bushel. No house in the country can offer you a better strain or finer quality. Whether you are raising barley for feed or market, it will pay you to sow a ~~malting~~ variety, for at times fancy malting barley is in great demand at high prices. Get started in this fine variety.

Price per 100 lbs., \$3.00.

Seed Corn

We are offering the following Idaho grown, acclimated varieties:

CASSIA COUNTY FLINT—A very large eared variety of Flint corn that

has been grown in this section for several years. It has proven a big yielder and an all around good corn for this section.

WHITE PEARL—This variety has been grown and has matured here nicely each season the past five years. It is a white dent corn, medium sized ear, generally making two ears to the stalk. Of good feeding value and we consider it an A1 variety for the farmers of this section.

MINNESOTA NO. 13.—This is a yellow dent, very early, that has been grown successfully here the past two or three seasons. For those who prefer a yellow dent variety we can recommend this variety.

Price on all of above varieties per lb., 10c; 3 lbs., 25c; 10 lbs. or more at 5c per lb.

All prices on grass and field seeds subject to market fluctuations.

Pasture Grasses

Clovers

We make a specialty of high grade grass seeds. No house in the country can offer you finer quality. It is our aim to handle the purest and cleanest stock we can procure. In comparing our prices on grass seeds with others, we want you to compare the quality of stock also, and we feel con-

fident of getting your orders. We can furnish reliable tests on all our grasses. Our trade in pasture grasses grows rapidly from year to year, and our customers recommend our goods. It will pay you to sow Darrow Brothers' grass seed.

Pasture Grasses—Clovers

	100 lbs.
Alfalfa—Turkestan—Dry Land, lb. 30c; 10 lbs., \$2.50	21.00
Alsike Clover	Ask for Prices
Alfalfa—Idaho grown	\$15.00 20.00

Timothy—Fancy	7.00
Tall Meadow Oat Grass	25.00
Perennial Rye Grass—Fancy	10.00

Orchard Grass

Note—We are receiving many inquiries for Alsike and White Clover seed to be used for seed growing purposes. Our stock of Alsike, Idaho grown, was exhausted about January first, due to the great demand and we find it very difficult to procure seed of a grade we consider of proper purity to sow for growing a seed crop. If, with our connections, we find it difficult to secure stock of the proper quality, it will be much more difficult for the average farmer and we want to advice our friends to use care in buying Alsike this season. We will endeavor to supply our customers to the best of our ability with high grade seed, but prefer to lose sales to offering any other kind.

The White Clover situation is no better, if as good, as the Alsike, and we would advise our friends that they postpone seeding these two clovers for seed growing purposes, unless they are sure the seed offered is free of noxious weeds. We have a limited quantity of high grade seed in stock.

Pasture Mixtures

We do not offer a prepared mixture for pastures, preferring to let our customers buy the grasses separately and do their own mixing. In this way the buyer knows exactly what he is buying and sowing, which he does not know when sowing a prepared mixture. We recommend the following as the mixture best adapted to our soil and weather conditions, and claim it will carry more stock and produce better feed than any other mixture we know of: Sow 20 lbs. per acre—Orchard Grass, 6 lbs., Kentucky Blue Grass, 5 lbs., Meadow Fescue, 5 lbs., Perennial Rye Grass 2 lbs., Alsike Clover, 2 lbs. We have sold this mixture the past four seasons and have never seen anything to beat it.

Note—This is the year to sow pastures. Most grasses are cheaper than for several years past, and perhaps cheaper than they will be again for several years. This is a coming livestock and dairy section. It will pay you big to get your farm in shape for livestock by sowing a good mixed pasture.

Spring Vetches

A most valuable leguminous plant, one of the quickest and best fertilizers known. Valuable as a hay crop, making several tons per acre the first season, and unequaled as pasture. Will not bloat, can be sown in early spring and will make an abundance of good pasture or hay first season. Just the thing where quick results are required. Sow as early in spring as frost leaves the ground.

Price, lb. 10c; 5 lbs., 40c; 10 lbs., 50c; 100 lbs., \$4.50.

Potatoes

In a commercial potato section attention should be given to producing the best commercial varieties. What the market wants is the thing to raise, if you are to market your crop to the best advantage. From the start we have been in a good position to study the requirements of the potato market, and we have endeavored to secure the best market varieties. Our observation is that a few good varieties is much better than many in a commercial potato section, as it tends to insure uniformity of the stock. We have been shippers of market and seed potatoes for several years, and have familiarized ourselves with all varieties of special merit. We bring in fresh seed stock and are always in position to offer our growers something worth while.

EARLY EUREKA (Irish Cobbler).

We introduced this potato in this section several years ago and take considerable pride in the fact that it has practically displaced all other

early varieties here, as it is fast doing in many other early potato districts. In our opinion (and we know the majority of our growers will confirm us in this) it is the most valuable market variety ever raised in this section.

It is an early variety of the round white type so much desired in the best markets, matures in about the same time as Early Ohio, but a much finer potato in every respect and a heavier yielder than that well known variety. We believe that the Eureka will, on the average, out-yield any other early potato. Sells equally as well as a late or storage potato. In fact it would be hard to mention all the good qualities of this great variety.

If you are raising potatoes for market you can't afford to be without the Eureka or Cobbler. Our seed was raised by ourselves from stock brought by us from the East last season. Price for hand picked stock, per 100 lbs., \$1.50.

SIR WALTER RALEIGH.

This is a late heavy yielding variety of the round white market type. We claim that the Raleigh will out-yield any other potato in this section, and that it will cull less than practically any other variety. Yields of over 600 bu. per acre have been made here with practically no culls. Particularly good for planting on new sage brush lands and unfertilized ground. This potato is seedling of Rural New Yorker and is similar in appearance to that well known variety, but runs more uniform in size, very few small potatoes in the bill. Price for hand picked stock, per 100 lbs., \$1.25.

Garden Seeds

Our stock of garden seeds is equal in quality to the best stock offered by the largest houses. We carry but one grade, "The Best," and our prices are in line with other reliable houses. We invite you to make comparisons. We use great care in buying to secure reliable strains and most of our vegetable seeds are of Market Gardener's strain. Many of our seeds are grown especially for us; we do not raise them all (neither does any other house, no matter what they may claim). We carry the varieties best adapted to this section. Our seeds are all tested for germination before being placed on sale, and are of good vitality. Don't buy commission seeds if you want best results. Try our bulk seeds and you will continue to use them.
